

# Dan Kepka

Lead Software Engineer

Dan joined MainStreet Advisors in 2014 as Lead Software Engineer, spearheading the development of the firm's proprietary portfolio management platform. He designed a scalable, service-oriented system integrating Java, Spring Boot, Kotlin, Quarkus, and Vue to enhance efficiency and user experience.

His work included integrating external vendors, optimizing the ETL process to streamline onboarding, and developing analytics tools for data accuracy and portfolio performance. He also overhauled the firm's billing system.

With vast expertise in financial technology and software architecture, Dan played a key role in advancing MainStreet Advisors' portfolio management capabilities.

## EDUCATION

*Indiana University, Bachelor of Science in Computer Information Systems (CIS)*
